Detailed Report

Learning Standard	exam	gateway	tutorial	webwork
ch0-COM-vecarith I can add, subtract, and scale vectors in $\mathbb{R}^n$ and compute linear combinations.		✓		✓
ch0-CON-vecline I can represent a line in $\mathbb{R}^2$ and $\mathbb{R}^3$ in vector form.	✓	✓		✓
ch0-VG-plane Given a plane in $\mathbb{R}^3$, I can sketch it and describe it with a vector equation.	✓		✓	X
ch0-WRIT-sets I can read and write set-builder notation correctly.	✓			
ch1-COM-rref I can row reduce a matrix to reduced row echelon form.		✓		✓
ch1-CON-augsoltype Given an augmented matrix in echelon form, I can classify the solution set (none, unique, infinitely many).	X	X		X
ch1-VG-rowpic I can interpret the solution set of a 2x2 or 3x3 linear system geometrically.	✓		✓	✓
ch2-COM-matvec I can compute a matrix-vector product and use it to evaluate a linear transformation.		✓		X
ch2-COM-standmat I can find the standard matrix of a linear transformation from its action on basis vectors.		✓		
ch2-CON-lintrans I can verify whether a given map is a linear transformation.	✓	✓	✓

Detailed Report

Learning Standard	exam	gateway	tutorial	webwork
ch0-COM-vecarith I can add, subtract, and scale vectors in $\mathbb{R}^n$ and compute linear combinations.		X		✓
ch0-CON-vecline I can represent a line in $\mathbb{R}^2$ and $\mathbb{R}^3$ in vector form.	X	✓		X
ch0-VG-plane Given a plane in $\mathbb{R}^3$, I can sketch it and describe it with a vector equation.	✓		✓	✓
ch0-WRIT-sets I can read and write set-builder notation correctly.	✓			
ch1-COM-rref I can row reduce a matrix to reduced row echelon form.		✓		X
ch1-CON-augsoltype Given an augmented matrix in echelon form, I can classify the solution set (none, unique, infinitely many).	✓	✓		✓
ch1-VG-rowpic I can interpret the solution set of a 2x2 or 3x3 linear system geometrically.	✓		✓	✓
ch2-COM-matvec I can compute a matrix-vector product and use it to evaluate a linear transformation.		✓		✓
ch2-COM-standmat I can find the standard matrix of a linear transformation from its action on basis vectors.		✓		
ch2-CON-lintrans I can verify whether a given map is a linear transformation.	✓	✓		
ch2-VG-unitlintrans I can describe the effect of a linear transformation on the unit square.			X
